Profile

Frontend Developer experienced in building responsive and scalable web applications using HTML5, CSS3, JavaScript, React.js, and Tailwind CSS. Proven ability to develop reusable components, implement dynamic UI features, and integrate REST APIs to deliver interactive user experiences. Strong foundation in both React and vanilla JavaScript, with a focus on performance, clean architecture, and maintainable code. Actively growing expertise in TypeScript and contributing to team-based development environments.

Professional Experience

FrontEndDeveloper, KayeClothing (Contract) 12/2024 – 06/2025
Nigeria

Developed three responsive web interfaces to showcase fashion collections and clothing products Built clean, visually appealing UI layouts using reusable card components Implemented optimized loading screens to enhance user experience Structured interfaces for smooth navigation and clear product presentation Focused on performance optimization and responsive design across devices Translated design ideas into functional, user-friendly interfaces Handled loading states and asynchronous data fetching

FrontEnd Developer, HNG (internship) 06/2024 – 08/2024
Nigeria

Developed complex web applications using HTML, CSS, JavaScript and React Collaborated effectively with cross-functional teams to ensure timely delivery of projects. Troubleshoot and debugged various issues with existing software systems. Participated in code reviews, providing constructive feedback and fostering knowledge sharing within development team. Adapted to new technologies and project requirements quickly, demonstrating strong learning and problem-solving skills.

Front End Developer, Cowrywise (skillbased team) 10/2025
Nigeria

Collaborate with a team of frontend developers to build responsive and user friendly web interfaces Develop UI components using HTML5, CSS3,Tailwindcss, JavaScript, and React.js Translate design concepts into functional and accessible web pages Work on real-world projects involving API integration and dynamic data handling Use Git and GitHub for version control and team collaboration Participate in code reviews and improve code quality through feedback Apply responsive design principles to ensure cross-device compatibility Continuously learn and adopt modern tools like Tailwind CSS and TypeScript Created UI components with reusable codes for a better user experience.

Experience mentoring other developers

Assisted teammates by reviewing code, sharing frontend development best practices, and providing guidance on React and JavaScript concepts.

Skills

Technical Skills Core Technologies: HTML5, CSS3, JavaScript (ES6+)

Frontend Frameworks: React.js, Tailwind CSS

State Management: React Hooks, Context API

Learning / Growing Into: TypeScript

Tools: Git, GitHub, CI/CD: GitHub ActionsVS Code

API & Data Handling: REST APIs, Fetch API, Async/Await

Backend

- Node.js (Currently Learning)
- Express.js (Currently Learning)

Other: Responsive Design, Cross-browser Compatibility, Component-Based Architecture

Accessible and internationalized web interfaces

Accessibility (WCAG Fundamentals)Semantic HTMLResponsive Design

Projects

Metaverse Rental Platform

03/2026 – 03/2026

Built a responsive rental platform interface using HTML,CSS and JavaScript - Designed reusable UI components for listings and navigation - Implemented responsive layouts for mobile and desktop devices - Implemented dynamic filtering functionality using JavaScript to refine listings in real-time - Focused on scalable component structure and clean UI

Kaey Clothing (Fashion brand)

12/2024 – 06/2025

- Designed and developed a modern fashion website to showcase clothing collections
- Built responsive product layouts using reusable card components
- Implemented optimized loading screens for better user experience
- Ensured smooth navigation and clean UI structure
- Focused on performance optimization and mobile responsiveness

Movie Search App (TMDB API)

- Developed a movie search application using JavaScript and REST APIs
- Implemented dynamic search functionality with real-time results
- Built detailed movie pages with API data integration
- Handled loading states and asynchronous data fetching

E-commerce Web Application

Developed a responsive e-commerce application using JavaScript and modern UI practices - Built reusable components for product listings, cards, and navigation - Implemented dynamic filtering and product interaction features for improved user experience - Managed application state and UI updates using JavaScript logic - Designed clean, user-friendly interfaces with strong attention to UI/UX - Optimized performance and responsiveness across devices

IBlog , React.js, Tailwind CSS, JavaScript, REST API, Firebase Authentication

07/2026 – 08/2026

- Built a responsive blog platform with **CRUD functionality**, allowing users to create, edit, read, and delete posts.
- Integrated **REST APIs and Firebase Authentication** with form validation and error handling.
- Developed reusable React components and custom hooks while implementing features such as **Markdown content, bookmarks, and reading-time estimates**.
